GLOWBITE

Dental Water Flosser Pre-order Webpage Brief

A practical handoff document for the person building the landing page

Primary goal: Turn interested visitors into genuine pre-order leads, while clearly explaining the product and collecting customer details with consent.

Prepared for: GlowBite website build
Brand direction: clean, modern, trustworthy, wellness-focused

Working brief • Version 1.0 • 18 October 2026

1. Project overview

Brand: GlowBite
Product: Dental water flosser
Page type: Single-product pre-order landing page
Primary conversion: A visitor submits the pre-order form. The page should not imply that an order or payment is confirmed unless the business has actually set up that process.

The page should help a first-time visitor quickly understand what the flosser does, why it may fit their routine, what is included, the expected price, and what happens after they submit their details.

2. Audience and positioning

Audience: People interested in improving their daily oral-care routine, including people who want an additional way to clean between teeth. Avoid implying the product replaces brushing or professional dental care.

Positioning: A convenient, reusable water-flossing device designed to make an oral-care routine feel easier and more complete.

Core message: “Make your daily oral-care routine feel more complete with GlowBite.”

3. Brand design direction

Use	Colour	Hex	Direction
Background	Pale blue	#DDF3FF	Fresh, light, spacious
Primary accent	Bright cyan	#00C2FF	Buttons and highlights
Secondary accent	Blue	#00AEEF	Icons and small details
Text	Deep navy	#1E2D40	Headings and body text

Visual style: minimal, premium-but-accessible, mobile-first, bright product photography, rounded cards, clear spacing, and strong contrast. Avoid clutter, exaggerated medical claims, or generic stock photos that misrepresent the actual product.

4. Product details to show

Use the following details as the current working specification. Confirm each item against the actual product/sample before publishing.

Feature	Working detail
Pre-order price	■1,299
Planned MRP	■1,499 (show as MRP only if confirmed and legally appropriate)
Modes	5 modes, including a child mode
Water tank	350 ml
Tips	5 tips included
Water resistance	IPX7 (verify supplier documentation before claiming)
Charging	USB-C
Warranty	1 year (publish only once terms and service process are confirmed)

Feature	Working detail
Shipping	Free shipping was planned; confirm serviceable areas and terms

5. Recommended page structure

A. Hero section (first screen)

Show the product image, a clear headline, one-line benefit, price, and the main CTA. Suggested headline: “A fresher-feeling clean, made simple.” Supporting line: “Meet the GlowBite Water Flosser—designed to add water flossing to your everyday oral-care routine.” CTA: “Join the Pre-order List”.

B. Benefits

Use 3–4 short benefit cards: “Multiple modes for a personalised feel”; “Portable, rechargeable convenience”; “A generous 350 ml tank”; “Multiple tips for different users/routines”. Do not claim clinical results or guaranteed health outcomes.

C. Product features

Show 5 modes, 350 ml tank, 5 included tips, USB-C charging, IPX7 rating (if verified), and warranty (once terms are final). Use product-specific photos or clean icons.

D. How it fits your routine

Use a simple 3-step visual: Fill the tank → Choose a comfortable mode → Direct the water stream along the gumline and between teeth, following the product instructions. Link to the official instruction guide if available.

E. What’s in the box

Show the actual included items and quantities: flosser unit, tips, charging cable, and any other accessories only if they are included in the delivered package.

F. Price and pre-order CTA

Display ■1,299 as the proposed pre-order price only while that offer is active. Explain whether this is a non-binding interest list or a paid reservation. Do not collect payment unless the payment, refund, delivery, and order-confirmation processes are ready.

G. FAQ

Answer: What is a water flosser? What comes in the box? How is it charged? Is shipping free? When will it ship? What is the warranty process? Can I cancel? Is it suitable for children? For children, direct users to the product instructions and adult supervision; do not make broad safety claims.

H. Footer

Include GlowBite contact details, privacy notice, terms, cancellation/refund terms if relevant, shipping information, and social links. Use only official, working links.

6. Pre-order form and data collection

Keep the form short so it works well on mobile. Recommended fields:

- Full name
- Mobile number (required if WhatsApp/SMS follow-up is planned)
- Email (optional unless needed)
- PIN code (to check serviceability)
- Quantity (default 1; optional)
- Optional checkbox for marketing updates, separate from necessary pre-order follow-up

Consent text suggestion: “By submitting, you agree that GlowBite may contact you about this product enquiry or pre-order. Read our Privacy Notice to understand how your details are used.” Add a separate, unchecked opt-in for promotional messages.

Important: Tell visitors exactly what submission means. If it is only a lead list, label it “Join the pre-order list” and say no payment is taken now. If it is a true order, specify payment status, expected dispatch window, cancellation/refund rules, and confirmation process before accepting it.

7. What should happen after submit?

1. Validate required fields and phone/PIN-code format.
2. Save submissions to a secure, access-controlled sheet or database; avoid exposing the data publicly.
3. Show a success message: “Thanks for your interest in GlowBite! We’ll contact you with pre-order details.”
4. Send a notification to the GlowBite team.
5. Prevent accidental duplicate submissions where practical.
6. Test the form on mobile and desktop, and verify that data is actually saved.

Suggested success message

“You’re on the list! Thanks for your interest in GlowBite. We’ll reach out with the next steps and availability details. No payment has been taken.” Use the final sentence only if that is true.

8. Technical and delivery requirements

• Mobile-first and responsive layout.
• Fast loading; compress product images and avoid unnecessary animations.
• One clear primary CTA repeated at sensible points.
• Form validation, spam protection, and secure storage.
• Basic SEO title and description; social-sharing preview image.
• Analytics for page views, CTA clicks, and successful form submissions, subject to appropriate privacy disclosures.
• Test the full journey: open page → fill form → submit → verify saved lead → see success state.
• Provide GlowBite with editable access, source files or platform handover, and instructions to change price, copy, and delivery dates.

9. Copy the builder can use

Headline: A fresher-feeling clean, made simple.
Subheadline: Discover the GlowBite Water Flosser—a rechargeable device designed to make water flossing part of your daily oral-care routine.
Price line: Pre-order interest price: ■1,299 • Free shipping, subject to confirmed terms.
CTA: Join the Pre-order List
Trust line: Product details, availability, shipping and warranty terms will be confirmed before your order is finalised.

Treat this as draft copy. Confirm the product specification, offer, shipping promise, warranty, and launch timeline before publishing.

10. Assets and information GlowBite must provide

Before launch, the builder needs:

- Actual product photos from multiple angles
- Packaging and “what’s in the box” photo
- Logo files and preferred font, if available
- Confirmed price and whether pre-order is paid or interest-only
- Launch/dispatch estimate, or clear wording that timing is not yet confirmed
- Shipping policy and PIN-code serviceability details
- Written warranty terms and support contact
- Verified feature claims, especially IPX7 and child mode
- Privacy notice, terms, and cancellation/refund policy where applicable
- WhatsApp/email/phone contact and official social links

11. Acceptance checklist

The page is ready when:

- It looks correct on common mobile and desktop screen sizes.
- Visitors can understand the product, price, and pre-order process quickly.
- CTA buttons work and lead to the correct form/section.
- Form submissions are saved and visible only to authorised people.
- Consent and privacy wording is visible before submission.
- The confirmation message accurately describes what happens next.
- No unverified medical, safety, waterproofing, warranty, or delivery claims are published.
- GlowBite has access and can maintain the page after handover.

12. Message to send your friend

“Hey! I’m sharing the GlowBite pre-order webpage brief. Please build a clean, mobile-first landing page using the sections and brand colours in the PDF. The main goal is to collect genuine pre-order leads and save their details securely. Please keep the form simple, make the CTA clear, and don’t publish unverified product claims or promise a dispatch date until I confirm it. Before handover, test the complete form flow and show me where the submitted data is stored. Please also give me access to edit the page and its content.”
